2. MANAGEMENT DISCUSSION AND ANALYSIS

The company manufactures and markets Styrene Butadiene Rubber and Synthetic Rubber Latices.

I. CURRENT SCENARIO.

Your Company is one of the leading producers of polymer products namely Synthetic Latices (VP Latex, XSB latex, Nitrile Latex, Acrylic Latex) and Synthetic Rubber (HSR, SBR) in India. The Company has one of the broadest ranges of products based on Styrene – Butadiene chemistry available in the market today and caters mainly to the industrial segment. Our range of Synthetic Latices is used among other applications, for tyre cord dipping, paper and paperboard coating, carpet backing, concrete modification/ water proofing, textile finishing and paints. The various

grades of Synthetic Rubber find application in products such as footwear, automotive components, moulded items, v-belts, conveyor belts and hoses.

The company's major raw materials are petrochemicals and hence the business is vulnerable to high volatility of crude oil and its downstream product prices. Even though margins were under pressure due to steep raw materials price increases, overall business climate improved during the year since appropriate price increases were implemented to offset the higher cost of raw materials.

The company's performance was satisfactory due to volume increases which helped in achieving better economies of scale, addition of new value added products to our current range (particularly for the Paper Board coating, Construction and Rubber segments) as well as better operational efficiency.

For the last 5 years we have also been practicing Total Productive Maintenance (TPM) which is a Japanese methodology to improve Overall Plant Effectiveness and efficiency. This has helped significantly in improving plant operations and reducing costs. In January 2011, Apcotex has successfully crossed the 1st stage of the 3 step audit process for the TPM Level 1 Excellence Award. The remaining 2 stages of the audit will be conducted by the Japanese Institute of Plant Maintenance (Tokyo) in the FY 2011-12.

The technology at Apcotex was developed and is being continuously upgraded through in-house Research and Development efforts to meet the changing needs of customers.

Over the next few years we expect good domestic growth in most of the industries we cater to and we also envision good prospects for export of some of our products.

II. OPERATIONS DURING THE YEAR.

During the year the Company achieved Gross Value Sales of ₹ 22165.76 Lacs and volume sale of 28126 MT, registering a growth of **41.35%** and **20.05%** respectively compared to that of the preceding financial year.

The prices of major raw materials Styrene and Butadiene softened during the second quarter of the financial year but again started firming up during the second half of the financial year.

During the financial year the company exported goods worth ₹ 989.61 lacs compared to exports of ₹ 879.73 lacs during the previous financial year.

There was a continuous thrust from the management to develop a strong R&D and technical service team to better understand the changing customer needs, improve product quality, productivity and process controls through technology up-gradation.

During the year, operating profits, before tax and depreciation but including the other income from the operations and income from the Wind Turbine Generator installed at Sadawaghapur, Near Satara, Maharashtra,

increased by 16% to ₹ 1582.26 Lacs from ₹ 1364.27 Lacs during the previous financial year.

Other income, which includes dividend received on investments, profit on sale of investments, Rental Income etc., was at ₹ 207.39 Lacs as compared to ₹41.20 Lacs during previous financial year.

The profit after tax stood at ₹1072 Lacs as compared to ₹833 Lacs in the previous financial year.

Your Directors consider Company's performance as satisfactory.

III. OUTLOOK.

From overall perspective, we expect 2011-12 to remain challenging in terms of volatilities in prices of major Inputs but overall growth of the economy, introduction of new value-added products and improving current market share, will augur well for the Company.

The company will endeavour its best to bring in efficiencies at all levels to mitigate any adverse situation. Accordingly your Director view the prospect for the year 2011-12 with cautious optimism.

IV. RISK AND CONCERNS.

The Company's business is highly dependent on two petrochemicals products viz. Styrene and Butadiene. Both of the above input materials, though derived from crude oil, were not traded in any exchange(s). No co-relation in their prices to crude oil price is observed. Hedging of the risk therefore is not possible.

Some of the major raw materials are directly imported or have USD based pricing. If the INR weakens against the USD or becomes highly volatile the currency effect is expected to be adverse.

Rising inflation within the country will seriously affect disposable income levels of all consumers – both rural and urban. Uncertain consumer demand can also have an effect on the growth prospects of your company.

V. INTERNAL CONTROL SYSTEMS AND THEIR ADEQUACY.

Internal checks and controls based on the ERP system is in place and is constantly being improved upon. Adequate system exists to safeguard company's assets through insurance and maintenance of proper records. The company has well defined procedures to execute financial transactions. The company is constantly improving its internal audit areas in the light of an encompassing ERP system introduced as mentioned above.

VI. DEVELOPMENT OF HUMAN RESOURCE / INDUSTRIAL RELATIONS.

The company continuously monitors its Human Resource requirement to ensure that it has adequate human skills commensurate with its needs.

Cordial relations exist between the employees at various levels and the management.

To upgrade Human skills and improve their competency the company continuously organizes and deposes employees to Seminars, Workshops.

CAUTIONARY STATEMENT.

Statement in this Management Discussion and Analysis describing the Company's objectives, projections, estimates, expectations or predictions may be "forward-looking statements" within the meaning of applicable securities laws and regulations. Actual results could differ materially from those expressed or implied. Important factors that could make a difference to the company's operations include raw material availability and prices, cyclical demand, movements in company's principal markets, changes in Government regulations, tax regimes, economic developments within and outside India and other incidental factors.
